Unity | Commitment | Responsibility | Excellence | Support | Innovation

We are looking for an Assembly Technician for our 2nd shift who will be responsible assembling components into a subassembly or finished product as the customer demands. This position will be incredibly versatile and will work with a variety of materials including some in-house fabricated parts and some components delivered to us by the customer.

Here's what you'll be doing:

- Receive work orders with instructions and work to assemble components
- Monitor materials and assembled products for quality standards and compliance to customer specifications
- Log completed quantities and or/ completion of work orders in the ERP system
- Assist with Metal Finishing, as needed
- Be flexible and versatile to fill-in in other areas to meet the needs of ever-changing bottlenecks.

You'll love this job if you have/are:

- 1 – 5 years of assembly experience
- Committed to contributing to the team effort
- Flexible and willing to assist the team in other areas when needed

Position Details:

- Work Schedule: Monday – Thursday, 4:30pm – 3:00am
- Wage Range: $16 - $18 / hour

We have delivered high-quality products for three generations. We have an amazing team and want someone who cares about fostering a positive, team-orientated, engaging culture!
